

Queen's University, Orthopedic Surgery Upper Extremity Fellowship

Coordinator: Ryan Bicknell, MD, FRCSC

Faculty: Ryan Bicknell, MD, FRCSC; David Pichora, MD FRCSC

Number of Positions: 2

Duration: 1 year (2 six month rotations with each surgeon)

Start Date: July 1st annually

Application Deadline:

Canadian Applicants: December 31st (18 months prior to the proposed start of the fellowship)

International Applicants: July 31st (the year prior to the proposed start date)

The Division of Orthopedic Surgery at Queen's University offers a comprehensive one-year upper extremity fellowship. The fellowship is open to appropriately qualified Canadian and internationally trained orthopedic surgeons who are seeking additional subspecialty training in upper extremity.

Clinical supervision is by two orthopedic surgeons, one with a subspecialty practice in upper extremity and hand surgery, and the other with a subspecialty practice in shoulder and elbow surgery. The program offers a broad, tertiary care experience in all aspects of upper extremity surgery, including reconstruction, arthroplasty, trauma, and peripheral nerve.

In addition, extensive research opportunities are provided in a multidisciplinary research laboratory focusing on clinical outcomes, orthopedic bio-engineering, computer-assisted surgery and molecular biology. Protected weekly research time will be allocated to a project of publishable quality expected at the completion of the fellowship.

Fellows will be expected to participate in a variety of related academic activities, including formal and informal medical student and resident teaching and preparation of rounds and conferences.
