

## Krista Goulding, M.D., M.P.H.

Orthopedic Surgeon, Division of Orthopedics, Section of Oncology

Dr. Goulding is an Orthopedic Surgeon at Mayo Clinic Arizona, where she specializes in caring for patients with sarcomas and other cancerous and non-cancerous tumors of the musculoskeletal system.

Her interests include:

- Surgery for adult and pediatric bone and soft tissue sarcoma
- Benign and malignant bone and soft tissue tumors
- Pelvis and sacrum surgery
- Primary and revision hip and knee arthroplasty
- Metastatic bone disease

Dr. Goulding's expertise is in limb preservation surgery using innovative techniques (synthetic and bone transplants, 3D printed and patient-specific implants, joint replacement). Her goal is to cure cancer while preserving function and quality of life. She is involved in research on a national and international scale, and is currently researching ways to improving surgical, oncologic and health-related quality of life outcomes for patients with malignant bone and soft tissue cancers.
